DETAILED ACTION

Status of Claims

Claims 1-11, 20-23 and 28-33 are pending in the application.

Receipt is acknowledged of amendment / response filed on May 25, 2004 and that has been entered. Claim 20 has been amended.

Claims 20-23 and 30-33 are withdrawn from further consideration pursuant to 37 C.F.R. 1.142 (b) as being drawn to a non-elected subject matter.

Information Disclosure Statement

Receipt is acknowledged of Information Disclosure Statement (IDS), filed on 12/08/03, which has been entered in the file.

Response to Election/Restriction

In response to the restriction requirement, Applicants have elected Group I, which includes claims 1-11, 28 and 29 drawn to a compound and composition with an election of species of compound (47) on page 18 of the specification (Remarks, page 13) with traverse is acknowledged. The traversal is on the ground(s) that all the pending claims should be rejoined and examined with the elected Group I because a search and examination of the entire Markush group "would not be an undue burden" on the Examiner.

The Examiner respectfully disagrees with the Applicants because the products of Invention groups I-III differ materially in structure and in element from each other and therefore, are capable of supporting their own patents. The invention groups I-III are related to a set of structurally diverse compounds, and their methods of use (chemical structures, which are similar, are presumed to function similarly, whereas chemical structures that are not similar are not

presumed to function similarly), which do not possess a substantial common core wherein a reference anticipating one would not necessarily render the other obvious and to search all the above groups in a single application would be an undue burden on the Examiner. Because of the plethora of classes and subclasses in each of the Group, a separate search considerations are involved, which would impose a serious burden on the Examiner to perform a complete search of the defined areas if unrestricted. Also the fields of search are not coextensive. The wide disparity among the groups requires that many divergent fields must be searched, including all classes and subclasses of U.S. and foreign patents as well as journals and publications. However, Examiner may reconsider to rejoin method of use claims commensurate in scope with the product claims when the case would be found in condition for allowance [provided those method claims are free from 35 U.S.C. §112 first (including written description, reach-through claim language and/or scope-enablement issues) and second paragraphs]. For these reasons, Applicant's arguments are found unpersuasive and, therefore, the requirement for restriction and election of species is still deemed proper.

Applicants preserve their right to file a divisional on the non-elected subject matter.

As set forth in the restriction requirement and an election of a single compound (or set of compounds), the invention will encompass all compounds that fall within the scope of the claim is as follows:

A compound of formula (I) of claim 1 wherein:

R₁ is aryl,

R₂ is a group of formula (II), wherein

A₁, A₂, and A₂₀ are as claimed,

n is 0,

R₇ is as defined,

R₈ is as defined,

X is a direct bond, and

R₃ is N-linked heteroaryl or an N-linked heterocycle (limited to heterocyclic 5-membered nitrogen ring).

As a result of the election and the corresponding scope of the compound identified, claims 20-23 and 30-33 and the remaining subject matter of claims 1-11, 28 and 29 are withdrawn from further consideration pursuant to 37 CFR 1.142 (b) as being drawn to non-elected inventions. The withdrawn subject matter of claims 20-23 and 30-33 is properly restricted as it differs materially in structure and in element from the elected subject matter supra so as to be patentably distinct there from.

Objections

Claims 1-11, 28 and 29 are objected to for containing non-elected subject matter. The claims should be amended to exclude non-elected subject matter and within the scope of elected compound. There is an apparent typo in claim 1 (amended), lines 16-17, page 2 for the expression "R_g" (correct expression probably is R₈). Similar typo also noticed in page 3, line 2 in claim 1 for "R_h". Appropriate correction is required.
